EDUCATION

University of Toronto St. George
Bachelor of Science in Computer Science

Sep 2019 - Apr 2024 (PEY/Coop)
Toronto, Canada

- **Relevant Courses:** Data Structures & Algorithms, Software Design, Databases, UI/UX, Web Programming, Software Engineering, Operating Systems, Statistics, Machine Learning, Neural Networks & Deep Learning, Software Ethics, Innovation & Entrepreneurship
- **Clubs:** You're Next Career Network, UofT Machine Intelligence Student Team, UofT Artificial Intelligence, UofT Google Developer Student Club, UofT Kendo Club
- **Hackathons:** Google Developers Solution Challenge: 2022, Hack the Globe: 2023, UofTHacks IX, X, XI: 2022-2024
- **Achievements:** \$4000 John W. Browne Award: 2023, Top 3 Actuarial Students' National Association Case Competition: 2022

SKILLS

Programming Languages: Python, Java, HTML, CSS, Javascript, SQL, Latex

Fullstack Frameworks: React, React Native, Node, Flask, Django, PostgreSQL, Tailwind, Bootstrap, Cucumber

Machine Learning Libraries: Tensorflow, NumPy, Pandas, Scikit-learn, Matplotlib

Tools: Git, Github, Gitlab, Firebase, Google Cloud, Google Colab, Heroku, Docker, Postman, Figma

EXPERIENCE

Lee Lab | Project Lead Developer (Supervision: Prof. Annie En-Shiun Lee)

Dec 2023 – Present

- Lead two engineers in the development of a Hokkien Translation App using Expo, React Native, Node.js, Native Base, & Firebase.
- App provided 5 Models to assist users: Text Translation, Sentence Generation, Hokkien Romanizer, Text to Image, & Text to Speech.
- Designed an optimized Firebase No-SQL database schema, minimizing redundant data operations and image storage costs.
- Organized scrum meetings, assigned tasks, and reviewed code in HTML, CSS, Javascript, & React Native using Git & Github.

You're Next Career Network | Software Engineer

Apr 2023 – Present

- Developed a Google Maps-like career fair venue map with React, React-Spring, Use-Gesture, Bootstrap, & Docker, featuring a location info panel. Utilized by 3400+ students and 70+ companies during Fall Career Fair Week 2023.
- Integrated user authentication with email/password, Google auth, LinkedIn OAuth2 for 7000+ users using Firebase and React.
- Implemented secure email/password sign-ups with an email verification link and personalized user experience with onboarding information.

UofT Machine Intelligence Student Team | Cloud Developer

Sep 2023 – Present

- Contributed to Kubernetes open-source cloud infrastructure projects by resolving existing issues.
- Assisted in planning and executing a series of cloud/open source workshops in collaboration with IEEE UofT.

GR4LLM | Research Assistant (Supervision: Prof. Eric Yu & Vik Pant - Chief Data Scientist @ PWC)

Sep 2023 – Dec 2023

- The selection and adoption of large language models (LLMs) for applications present a significant challenge for contemporary enterprises.
- Conducted goal-oriented requirements engineering for large language models (LLMs) and provided a structured approach to assess LLM suitability in various contexts. Inspired by GR4ML with three modelling views: Business, Analytics Design, and Data Preparation.
- Evaluated and visualized the positive and negative contribution of 10+ LLM metrics (e.g. perplexity) from reviewing 39 academic papers.

Veeva Systems (NYSE: VEEV) | Software Engineer in Test Intern

May 2022 – Apr 2023

- Led the development of a data validation automation tool using Java, saving 2,800 workdays/yr in data creation and productivity.
- Developed 145 automation tests using Java & Cucumber, resulting in improved software quality and reduction in testing time by 80%.
- Utilized Agile methodology and boosted personal productivity by 24 days/yr.
- Explored AI chatbot solutions with Dialogflow, React and Node, targeting to reduce onboarding time for new hires.

Korotu Technology | Software Engineer

Jan 2023 – Apr 2023

- Directed a team of six developers in engineering a tree species classification mobile app using Expo, React Native, Node, Express, Parse, Tensorflow, & Jest, deployed backend to Heroku, and ML model to Azure ML.
- Contributed as Scrum master, frontend, and ML engineer. Built front-end camera, image library, and deployed TensorFlow model.
- Offered 2 ML classifications: PlantID API and custom ML using Google's Mobile Plants classification model and iNaturalist plant dataset.
- Assisted forest conservation with user-driven tree species identification and data collection, reducing costs and expanding forest coverage.

PROJECTS

Unideer | React, DaisyUI, Tailwindcss, Next

Dec 2023 – Present

- Building a website application helping university or college applicants organize, plan, and apply.

WaterBNB | HTML, CSS, JS, React, SQLite, Python, Django

Jan 2023 – Apr 2023

- Developed an Airbnb replica with Token-based Authentication, User Profile, Notification, Comment, Rating, Reservation, Property, Search and Filter, and Pagination.

Vital Sport: Hack The Globe | TailwindCSS, Python, Django

Mar 2023 – Mar 2023

- Led a team of 3 on the Hack The Globe 2023 and created a full stack web app to help athletes monitor abnormalities in their cardiac cycle.
- Demonstrated potential to reduce cardiac deaths in athletes.
